Wet **Diamond Polishing Drum Wheels** are used to polish inside radius such as undermount sink holes. They are much easier than diamond polishing pads to use when polishing inside radius, while producing a high gloss. The wet diamond polishing drum wheels will also last longer than the dry diamond polishing drum.

We recycle our aluminum drums for \$4.00/pc (\$28/set of 7 pcs) store credit if aluminum drums are in reusable condition, making our diamond polishing drums effectively \$13.95/pc, the lowest in stone fabrication tools market in U.S. We will send you a coupon code toward your purchase of any items in our store after we receive the recycled aluminum drums.

- Size: 2" x 1-5/8"
- 5/8-11 thread, the wet diamond polishing drums can fit on most polishers and variable speed grinders.
- A set of 7 includes one each of 50 grit, 100, 200, 400, 800, 1500, and 3000 grit.
- Wet use only with center water fed

We highly encourage you to recycle the aluminum drums with us. You will not only receive store credit, but will also help protect our environment.
